

Title I Section 1118. Parent and Family Engagement Family Math Night Events

Nifty Numbers™ • Math Medley™ • Gellin' with Geometry™
Play-N-Take™ • Make-N-Take™ • Power Packs™

Building Strong Family-School Partnerships

Educating our children requires a team effort. Today's schools actively engage parents as partners around student learning. Our Family Math Nights are perfect examples of this in action. These fun and academically engaging events help parents feel connected, not only to the school community, but to their child's learning, as well. When families attend the event, teachers feel supported in helping students learn and kids see first-hand the value their parents place in their education. Collectively, these build a supportive learning environment for students, parents, and educators.

Engaging Parents Meaningfully

All parents want their children to succeed in school. That's why it's important to engage parents in their child's school experiences beyond bake sales and fall carnivals. Getting parents engaged on an academic level underscores their role as active participants and valued partners in the education of their children. Our Family Math Night events and Take-Home kits are excellent opportunities for parents to work with their child on important math concepts that reinforce classroom learning. Parents walk away knowing they have made an important contribution to their child's educational future.

Achieving High Standards

Research clearly indicates that parent involvement in their child's education has a significant impact on academic success. Our Family Math Night events and Take-Home kits engage families in ways that are linked directly to classroom learning. Parents work one-on-one with their child exploring hands-on, standards-aligned activities that reinforce what goes on in the classroom. They gain skills and strategies that can be used to help their child with math at home. When parents take an active role both in and out of the classroom, learning increases and test scores rise.
