

Create Your Own Sticker Patterns Activity Strips

Cut out each strip. Kids will use stickers to create their own patterns then turn the strips into a bracelet. They can write the "AB" pattern underneath each line, if they like.

The form contains ten identical horizontal activity strips. Each strip is designed to be cut out and used as a bracelet. It features a top dashed line, a middle solid line with ten evenly spaced tick marks, and a bottom dashed line. A vertical line is positioned on the right side of each strip, indicating where to cut. The strips are intended for children to use stickers to create their own patterns and then turn them into bracelets.
